Over the past 5 years, I have worked on multidisciplinary projects in construction, telecommunications, and IT, collaborating with vendors, stakeholders, and cross-functional teams. Skilled in requirements analysis, process improvement, and change management, I bring a balance of technical expertise and strong communication. I have led teams under pressure, applied automation to optimize workflows, and managed risk identification, mitigation, and escalation to ensure continuity in high-impact environments.

PROFESSIONAL EXPERIENCE

Delivery Analyst – Acxiom - Mexico City

December 2023 – Januar 2026

Coordinating production activities and software releases for clients across North America and Central America, ensuring smooth operations and service continuity in financial services systems, including remittances, bill payments, and check processing. Collaborating with cross-functional teams to deliver reliable solutions, automated internal processes, and maintained clear documentation and best practices. Monitoring KPIs, conducted root-cause investigations, and provided 24/7 on-call support for incident management (P1–P3), with a strong focus on risk mitigation and client trust through clear communication.

IT Auditor - Technology Risk - Ernst & Young GDS - Mexico City

June 2022 — June 2023

Collaborated with stakeholders to design and execute IT audit plans aligned with organizational objectives and risk assessments. Conducted comprehensive risk evaluations, identifying vulnerabilities and assessing the effectiveness of IT controls across systems and infrastructure. Performed detailed testing to ensure compliance with regulatory standards and best practices, recommending improvements to strengthen governance, minimize risk exposure, and enhance operational efficiency.

Integration Engineer - Ericsson - Mexico City

April 2019 — January 2020

Performed remote maintenance and upgrades of T-Mobile telecom equipment, ensuring network stability and KPI compliance across new site builds and antenna systems. Analyzed and troubleshooted scripts (Linux, SecureCRT) and resolved hardware issues in coordination with field engineers and tower crews. Acted as team lead within international cross-functional groups, balancing resources, facilitating discussions, and mitigating integration risks through stakeholder engagement and careful analysis.

Project Engineer - ICA FLUOR S.A de C.V - Mexico City

July 2018 — January 2019

Planned and tracked project activities in refinery and oil projects, supporting project management in budgeting, forecasting, and reporting. Coordinated weekly meetings with multidisciplinary supervisors to identify risks, anticipate bottlenecks, and balance workforce allocation. Assisted in proposal projects by preparing documentation, presentations, and milestone reports, acting as a liaison between engineering supervisors and project management to ensure clear communication and alignment across disciplines.

EDUCATION

M.Sc. Integrated Manufacturing Systems

February 2020 — September 2021

Silesian University of Technology - Gliwice, Poland - Graduated

B.Sc Control and Automation Engineering

August 2013 — December 2017

ESIME Zacatenco - Mexico City, Mexico - Graduated

CERTIFICATIONS

Scrum Master - The International Scrum Institute

Dec 2021
